Brian,

Thanks. Do you know if there is also a label on the dashboard indicating ULSD?

Thanks,

Hi Chris:

1) Diesel Fuel Cap and Fuel Door Label

(See attached file: DSC_0825.JPG) (See attached file: DSC_0827.JPG)

2) SMART EV: We do not believe there are any special user selectable modes (ie: range extend or extended battery life etc...) apart from current (8A , 12A Max Amp.) but to be sure we sent an email to the Smart EV responsible in Germany.

Best regards
Brian

questions

Diesel

Brian,

I was looking for the AECDs for test group DMBXT03.0U2A and was hoping you could help me. The individual application refers to the Common and "DMS". I could not find any diesel AECDs in the Common.

Thanks,
Chris Nevers
